

Table 1. Overview of CloudForest's main features compared with R's randomForest package (R's RF) and scikit-learn's RandomForestClassifier (SKL RF).

Implemented in	CloudForest Go	R's RF Fortran, C, R	SKL RF Cython
Handles categorical features	yes	yes	no
Handles missing values*	yes	no	no
*For all three approaches, missing values can be imputed.
